Ispirato al Codex Seraphinianus, l'enciclopedia visiva di Luigi Serafini, la collezione trasforma un alfabeto onirico in segni e simboli per leggere lo spazio come paesaggio di memoria e immaginazione.

Inspired by Codex Seraphinianus, the visionary encyclopedia by Luigi Serafini, the pattern becomes a new visual alphabet for reading space.

In collaborazione con Pavimenti Marra, le cementine sono realizzate con materiali e pigmenti naturali locali che richiamano i toni del territorio. Superfici sostenibili, uniche e durevoli, che diventano soglie poetiche tra corpo, materia e memoria.

In collaboration with Pavimenti Marra, the cement tiles are made with local natural materials and pigments that recall the tones of the territory. Sustainable, unique, and durable surfaces that become poetic thresholds between body, matter, and memory.

LAYOUT SUGGESTIONS

Concepita come un alfabeto visivo inedito, la collezione Seraphine trasforma un unico modulo di 25x25 cm in uno strumento di narrazione spaziale. Attraverso la semplice rotazione e alternanza del decoro, la piastrella supera la rigidità della geometria classica per generare pattern fluidi e mutevoli: dalle vibrazioni ottiche del layout Diamonds alla linearità ritmica di Stripes, fino all'eleganza scacchistica del Damier. Disponibile nelle tonalità naturali Brown, Green e Pink, Seraphine permette di disegnare paesaggi domestici che sono al contempo superficie e immaginazione.

Conceived as a new visual alphabet, the Seraphine collection transforms a single 25x25 cm module into a tool for spatial storytelling. Through the simple rotation and alternation of the motif, the tile transcends the rigidity of classical geometry to generate fluid and ever-changing patterns: from the optical vibrations of the Diamonds layout to the rhythmic linearity of Stripes, through to the checkerboard elegance of Damier. Available in the natural tones of Brown, Green, and Pink, Seraphine allows for the design of domestic landscapes that are simultaneously surface and imagination.
